

# OPC Foundation Cloud Initiative

## The Industrial Cloud Interoperability Standard

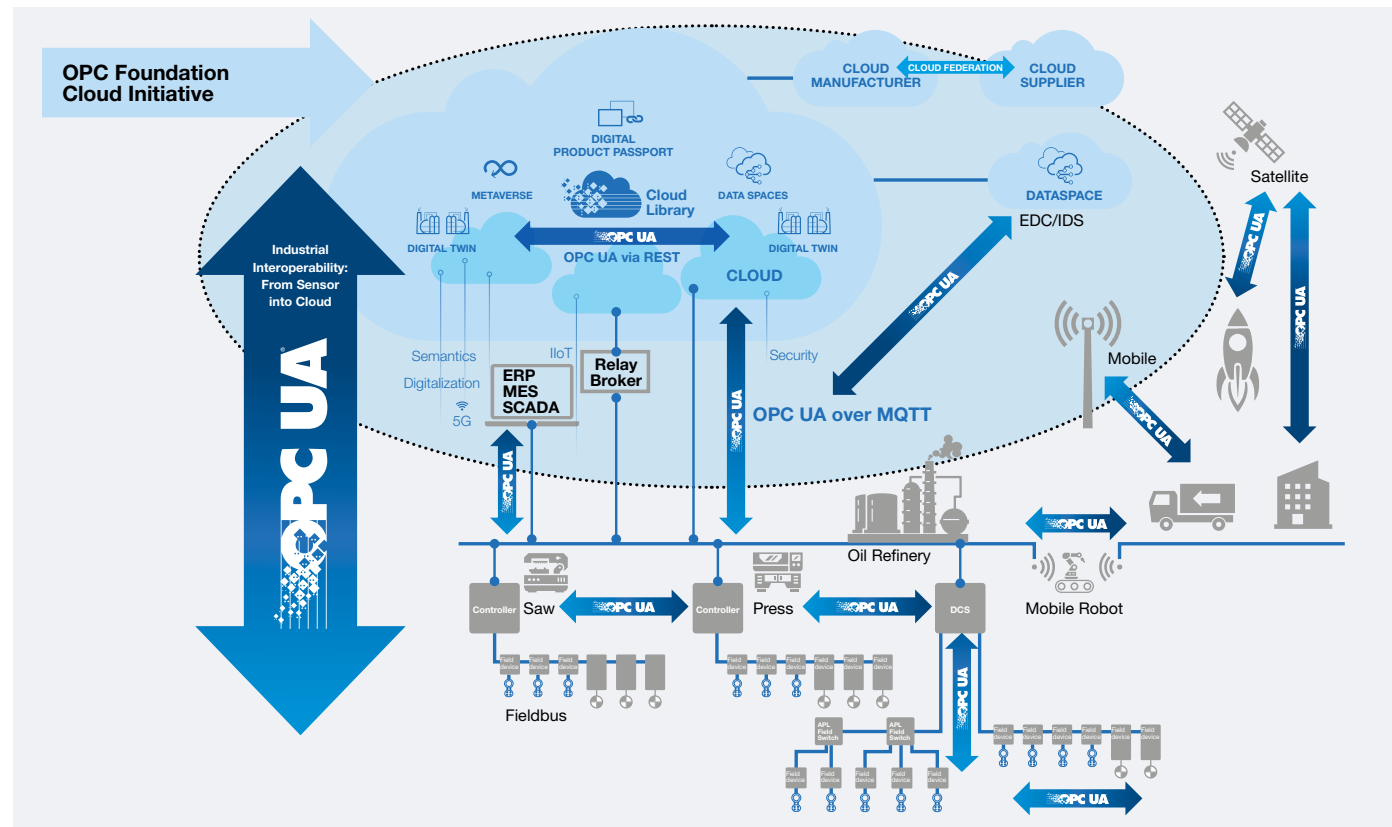

Version 3 // July 2025

Supporting cloud providers

## The Industrial Cloud Interoperability Standard

### Vision Building the Industrial Cloud Interoperability Standard

#### Goals

Digitalization in manufacturing is resulting in a world divided between those who possess and effectively utilize data and those who lack access to those resources. This is a barrier to both corporate success and macro-economic growth. Legislators (such as the EU with the upcoming Data Act) are responding to this by requiring vendors to share data among much broader eco-systems. In addition to requiring standardized data exchange in broader eco-systems, critical use-cases for traceability like the Digital Product Passport (DPP) and security aspects must be considered.

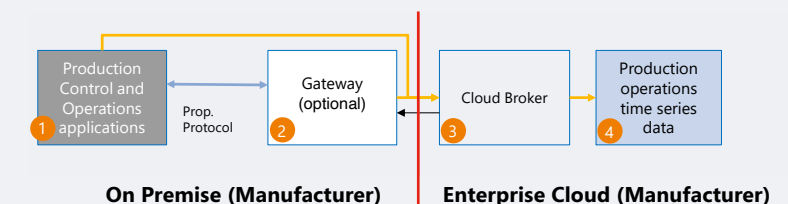

At the OPC Foundation, we believe that this creates a greater need for interoperability of end-to-end information models and standardized cloud interfaces to support these legislative demands.

## OPC UA – One harmonized Solution for OT/IT

### Deliverables

- Standardized interoperability: Accelerate **interoperability of IT and cloud applications** using OPC UA, e.g. data analytics using AI, industrial data spaces, digital product passports, industrial metaverse as well as digital twin applications.
- Semantic Data Models in the Cloud: **Maintain OPC UA Information Models (Companion Specifications)** in the cloud to utilize the context of data in cloud services.
- Best practices: Create a **cloud reference architecture** to provide best practices, increase standardized data sharing and cloud-optimized profiles for the OPC UA standard.
- Establish validation and certification for OPC UA Cloud Interoperability including a new **Protected Identity** for OPC UA Cloud eXchange “UACX”.

### Simplified Reference Architecture

At its core, the reference architecture consists of just a few components:

- Secure, standardized data ingestion from on premises machine data (1) via a broker (3).
- The time-series data is contextualized by OPC UA Information Models, adding semantic meaning (4).

### Use-cases

Depending on the supported OPC UA features and scenarios, additional components such as an on-premises gateway may be required:

**U1.** PLCs with support for OPC UA over MQTT can communicate directly with the cloud broker for bi-directional data exchange.

**U2.** On factory setups, additional firewalls can be put in place by the addition of on-premises gateways (2).

**U3.** Some OPC UA enabled assets may not support OPC UA over MQTT yet, but an OPC UA server instead. In these cases, a (2) gateway is needed to provide translation between OPC UA over MQTT and OPC UA client/server communication. Bi-directional communication can be achieved for this, too.

**U4.** For asset supporting industrial protocols such as Modbus, HART, or other non-OPC UA interfaces, the market offers a many industrial connectivity software options converting the legacy interface to OPC UA. It is highly recommended to use software supporting the integration of OPC UA Companion Specifications to enable modelling the OPC UA interface with standardized data models.

## Working Groups (WG) coordinated by the OPC Foundation Cloud Initiative

- **UA Cloud Library**  
A query-able online store of OPC UA Information Models
- **OPC UA over MQTT**  
Secure transport from edge to cloud and cloud to cloud, including a prototyping and a testbed group
- **OPC UA REST Interface**  
Easy access to OPC UA information for the IT world via a standardized REST interface
- **OPC UA Industrial Metaverse**  
Connecting the virtual and real world with OPC UA
- **OPC UA AI**  
Leveraging Large Language Models for and with OPC UA
- **OPC UA Data Space (in planning)**  
Provide decentralised semantic OPC UA information to central Data Spaces but keeping Data sovereignty
- **OPC UA WoT Connectivity**  
Standardized industrial connectivity software configuration

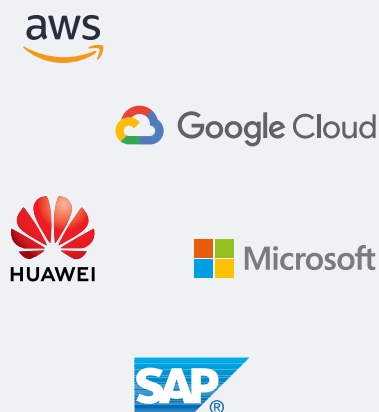

Detailed descriptions of the existing working groups, URLs for the open source reference code and further information can be found here:

## UA Cloud Initiative Reference Architecture – Generic

- 1 Machines of the Manufacturer on-premises building the product.
- 2 An OPC UA Information Model viewer tool that can upload these models to the UA Cloud Library.
- 3 A message broker operated by the manufacturer on-premises, usually as part of an edge infrastructure and usually supporting the MQTT protocol.
- 4 An industrial connectivity software reference implementation providing an aggregating OPC UA server interface and supporting the OPC UA WoT-Connectivity Companion Specification.
- 5 The on-premises part of the Manufacturing Execution System (MES). It often supports an OPC UA server interface to read status information and manages the operation of the machines.
- 6 Gateways manage the bi-directional data exchange from assets the cloud services offering both, an OPC UA Client and a OPC UA PubSub supporting both the MQTT and Kafka protocol.

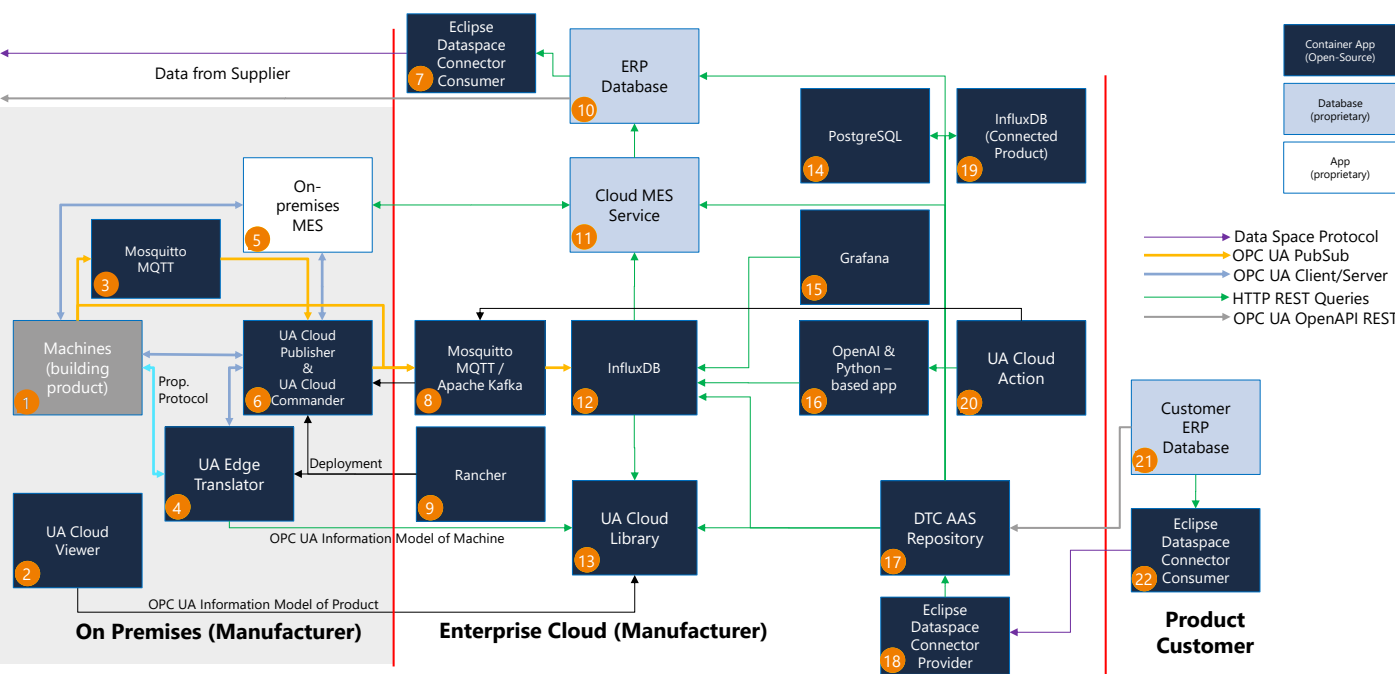

- 7 The Eclipse Dataspace Connector (EDC) consumer operated by the manufacturer which is used to establish trust between a supplier and the manufacturer by creating a digital contract. It also applies data sharing policies to the data received from the supplier.
- 8 The message broker operated by the manufacturer in the manufacturer's enterprise cloud. This can support either the MQTT or the Kafka protocol.
- 9 The industrial edge management software operated by the manufacturer in the manufacturer's enterprise cloud. It is responsible for deploying and managing edge applications on-premises.
- 10 The Enterprise Resource Planning (ERP) software operated by the manufacturer. It reads raw material and purchased components data from the supply chain.
- 11 The enterprise cloud part of the Manufacturing Execution System (MES). It often communicates directly with the ERP system and receives and processes production orders.

- 12 The time-series database receiving telemetry data from the production line via the cloud broker. It can also read order information from the MES system and OPC UA Information Model metadata from the UA Cloud Library.
- 13 The online store of OPC UA Information Models. This can either be the public instance operated by the OPC Foundation (mainly containing OPC UA Companion Specifications), or it can be a private instance operated by the manufacturer (containing OPC UA Information Models for the produced products), or both.
- 14 The database containing produced product information like specifications or user manuals.
- 15 Visual dashboards used to monitor the operation of the production.
- 16 AI-assisted analytics software used to calculate equipment effectiveness, make production forecasts and make predictions about required machine maintenance.
- 17 The Asset Administration Shell Repository reference implementation from the Digital Twin Consortium. It supports loading Asset Admin Shells modelled with OPC UA and provides the OPC UA OpenAPI REST interface. It provides product data to the customers of the manufacturer.

- 18 The Eclipse Dataspace Connector (EDC) provider operated by the manufacturer which is used to establish trust between a customer and the manufacturer by creating a digital contract. It also applies data sharing policies to the product data provided by the manufacturer.
- 19 The time-series database receiving telemetry data from product usage in the field.
- 20 An online reference application taking the outcomes of the production data analysis and making live modifications to the production via UA Cloud Commander (completing the digital feedback loop).
- 21 The Enterprise Resource Planning (ERP) software operated by the customer of the manufacturer. It reads product data from the manufacturer.
- 22 The Eclipse Dataspace Connector (EDC) consumer operated by the customer of the manufacturer which is used to establish trust between the customer and the manufacturer by creating a digital contract. It also applies data sharing policies to the data received from the manufacturer.

UA Cloud Initiative Reference Architecture – Open Source Offerings

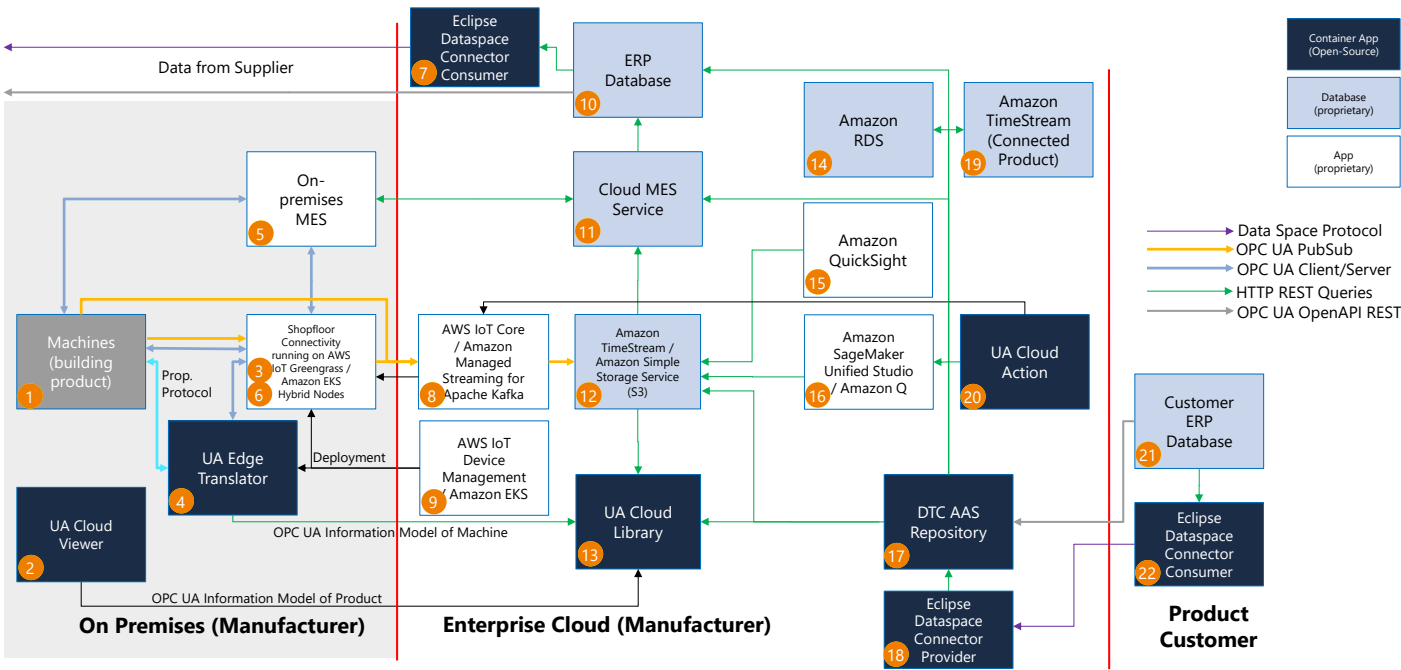

These building blocks are available as open source

Numer	Open Source
2	<a href="#">OPC Foundation UA Cloud Viewer</a> nodeset viewer and uploader.
3	<a href="#">Eclipse Mosquitto</a> MQTT broker.
4	<a href="#">OPC Foundation UA Edge Translator</a> supporting all leading industrial protocols south-bound and an OPC UA Server with WoT-Connectivity north-bound.
6	<a href="#">Umati UA Cloud Publisher</a> OPC UA PubSub publisher and <a href="#">OPC Foundation UA Cloud Commander</a> OPC UA PubSub subscriber supporting both the MQTT and Kafka protocol.
7	<a href="#">Eclipse Dataspace Connector</a> (EDC), in consumer configuration.
8	<a href="#">Eclipse Mosquitto</a> MQTT broker or <a href="#">Apache Kafka</a> broker.
9	<a href="#">SUSE Rancher</a> Kubernetes-based Edge application management.
12	<a href="#">InfluxData InfluxDB</a> production data time-series database.
13	<a href="#">OPC Foundation UA Cloud Library</a> online store of OPC UA Information Models.
14	<a href="#">PostgreSQL</a> product database.
15	<a href="#">Grafana Labs Grafana</a> visualization dashboards.
16	AI-assisted analytics software used to calculate equipment effectiveness, make production forecasts and make predictions about required machine maintenance.
17	<a href="#">Digital Twin Consortium Asset Admin Shell Repository</a> powered by OPC UA.
18	<a href="#">Eclipse Dataspace Connector</a> (EDC), in provider configuration.
19	<a href="#">InfluxData InfluxDB</a> product usage data time-series database.
20	<a href="#">OPC Foundation UA Cloud Action</a> for OPC UA PubSub cloud to edge messaging.
22	<a href="#">Eclipse Dataspace Connector</a> (EDC) from the customer, in consumer configuration.

OPC Foundation Cloud Referenz Architecture

Nr.	Generic Name	aws	Google Cloud	HUAWEI	Microsoft	SAP
1	Machines (building product)			Machines of the Manufacturer

UA Cloud Initiative Reference Architecture – Commercial offerings Huawei

UA Cloud Initiative Reference Architecture – Commercial offerings Huawei

Number	Generic name	 HUAWEI
1	Machines (building product)	Machines of the Manufacturer on-premises building the product.
2	Information Model Viewer	UA Cloud Viewer – Open-Source
3	Edge Broker	IoT Edge – At the edge, in close proximity to data sources or physical assets, an open platform integrating network, compute, storage, and application core capabilities, provides computing and intelligent services nearby.
4	Industrial Connectivity Software	UA Edge Translator – Open-Source
5	On-premises MES	On-premises MES
6	Gateway	IoT Edge – At the edge, in close proximity to data sources or physical assets, provides computing and intelligent services nearby.
7	Dataspace Connector Consumer	EDS – The data space exchange instance is a platform for exchange and sharing that is based on protecting enterprise data sovereignty, promoting efficient data circulation within enterprises, and maximizing data value.
8	Cloud Broker	<a href="#">IoT Device Access (IoTDA)</a> – The industrial IoT platform serves as a unified digital foundation for enterprises' production data, targeting the key challenges faced by manufacturing companies during the digital upgrade of their production processes. IoTDA – Provides massive device connectivity to the cloud, bidirectional messaging between devices and the cloud, batch device management, remote control and monitoring, OTA upgrades, and device linkage rules.
9	Edge Management	IoT Edge – At the edge, in close proximity to data sources or physical assets, an open platform integrating network, compute, storage, and application core capabilities, provides computing and intelligent services nearby.
10	ERP Database	ERP Database
11	Cloud MES Service	Model Based Manufacturing
12	Production Lines – Time-Series Database	<a href="#">GeminiDB</a> – A multi-model NoSQL database based on Huawei's independently developed decoupled computing and storage architecture, compatible with various protocols such as Redis, DynamoDB, Cassandra, HBase, and InfluxDB.
13	Information Model Library	UA Cloud Library – Open source
14	Product Database	<a href="#">RDS for MySQL/RDS for PostgreSQL</a>
15	Dashboards	<a href="#">DataArts Insights/ Data Lake Visualization</a> – The new generation of BI services provides visual, real-time, user-friendly, and secure business intelligence analysis services, enabling businesses to gain insights in the most natural and efficient way, supporting real-time and efficient decision-making.
16	AI-Assisted Analytics	<a href="#">ModelArts</a> – A one-stop AI development platform for developers, enabling rapid creation and deployment of models, managing the entire AI workflow cycle, and supporting intelligent upgrades across various industries.
17	Asset Admin Shell Library	DTC AAS Repository – Opensource
18	Dataspace Connector Provider	EDS – The data space exchange instance is a platform for exchange and sharing that is based on protecting enterprise data sovereignty, promoting efficient data circulation within enterprises, and maximizing data value.
19	Connected Product – Time-Series Database	<a href="#">GeminiDB</a> – A multi-model NoSQL database based on Huawei's independently developed decoupled computing and storage architecture, compatible with various protocols such as Redis, DynamoDB, Cassandra, HBase, and InfluxDB.
20	Cloud to Edge Messaging App	UA Cloud Action – Opensource
21	Customer ERP Database	Customer ERP Database
22	Dataspace Connector Consumer	EDS – The data space exchange instance is a platform for exchange and sharing that is based on protecting enterprise data sovereignty, promoting efficient data circulation within enterprises, and maximizing data value.

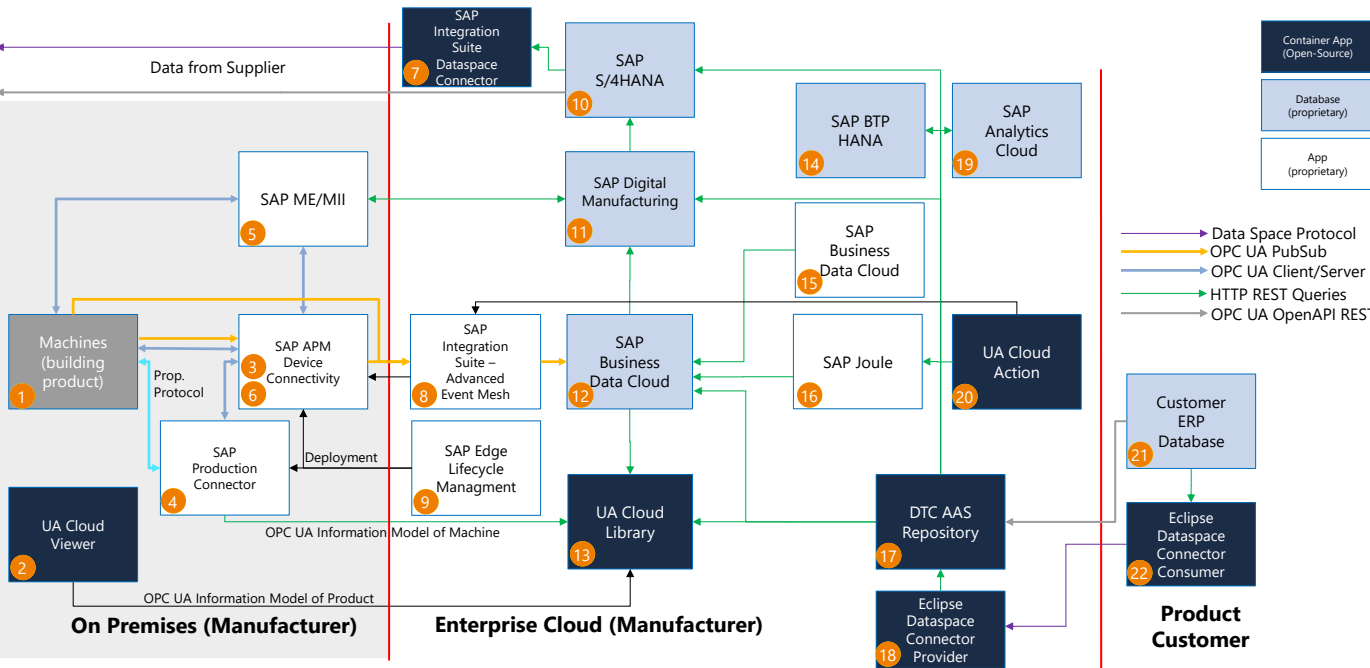

UA Cloud Initiative Reference Architecture – Commercial offerings Microsoft

These building blocks are available as Microsoft offerings

Number	Generic name	Microsoft
3	Edge Broker	<a href="#">Azure IoT Operations</a> with native OPC UA client and OPC UA PubSub support as well as an MQTTv5 broker, on <a href="#">Azure Local</a> operating system.
6	Gateway	<a href="#">Azure IoT Operations</a> with native OPC UA client and OPC UA PubSub support as well as an MQTTv5 broker, on <a href="#">Azure Local</a> operating system.
7	Dataspace Connector Consumer	Eclipse Dataspace Connector Consumer
8	Cloud Broker	<a href="#">Azure Event Grid</a> (MQTT) and <a href="#">Azure Event Hubs</a> (Kafka).
9	Edge Management	<a href="#">Azure Arc</a> edge infrastructure and application management.
10	ERP Database	<a href="#">Dynamics 365</a> ERP.
11	Cloud MES Service	<a href="#">Dynamics 365</a> MES.
12	Production Lines Time-Series Database	<a href="#">Azure Data Explorer</a> time-series, graph and data analytics production data database.
13	Information Model Library	UA Cloud Library
14	Product Database	<a href="#">Azure SQL</a> relational database.
15	Dashboards	<a href="#">Power BI</a> visualization and insights platform.
16	AI-Assisted Analytics	<a href="#">Copilot Studio</a> for creating Agents for your data.
17	Asset Admin Shell Library	DTC AAS Repository
18	Dataspace Connector Provider	Eclipse Dataspace Connector Provider
19	Connected Product Time-Series Database	<a href="#">Azure Data Explorer</a> time-series, graph, and data analytics product usage data database.
20	Cloud to Edge Messaging App	UA Cloud Action
22	Dataspace Connector Consumer	Eclipse Dataspace Connector Consumer

UA Cloud Initiative Reference Architecture – Commercial offerings SAP

UA Cloud Initiative Reference Architecture – Commercial offerings SAP

Number	Generic Name	SAP®
3	Edge Broker	SAP APM Device Connectivity
4	Industrial Connectivity Software	SAP Production Connector
6	Gateway	SAP APM Device Connectivity
7	Dataspace Connector Consumer	SAP Integration Suite Dataspace Connector
8	Cloud Broker	SAP Integration Suite – Advanced Event Mesh
9	Edge Management	SAP Edge Lifecycle Managment
10	ERP Database	SAP S/4HANA
11	Cloud MES Service	SAP Digital Manufacturing
12	Production Lines Time-Series Database	SAP Business Data Cloud
14	Product Database	SAP BTP HANA
15	Dashboards	SAP Business Data Cloud
16	AI-Assisted Analytics	SAP Joule
19	Connected Product Time-Series Database	SAP Analytics Cloud

UA Cloud Initiative Reference Architecture – Commercial offerings ABB

Nummer	Generic name	
1	Machines (building product)	<a href="#">ABB Industrial Equipments, Drives and Systems Machines</a> support connectivity with standard protocols.  Both ABB systems and Non-ABB systems are supported through <a href="#">Genix Industrial IoT and AI Platform Suite</a>
2	Information Model Viewer	ABB Ability Information Model & Genix Model Viewer are com-ponents of <a href="#">Genix Industrial DataOps Express</a>
3	Edge Broker	<a href="#">ABB Edgenius Broker</a> is a component of <a href="#">Genix EdgeAI</a>
4	Industrial Connectivity Software	<a href="#">ABB Genix Omni Source Integration Hub</a> provides 200+ pre-built adapters for industrial systems  <a href="#">ABB Edgenius Field Information Manager</a> provides Fieldbus level connectivity to hundred plus protocols
5	On-premises MES	<a href="#">ABB Ability MOM</a>
6	PubSub Data Publisher & PubSub Action Processor	Genix Data Publisher & Genix EdgeAI Orchestrator are part of <a href="#">Genix EdgeAI</a>
7	Dataspace Connector Consumer	Genix Industrial DataOps Message Sync brings the functionality of Dataspace Connector Consumer and is a component of <a href="#">Genix Industrial DataOps Express</a> .
8	Cloud Broker	Genix IIoT Gateway is a component of <a href="#">Genix IIoT Hub</a>
9	Edge Management	Genix Edge Management Portal is a component of <a href="#">Genix IIoT Hub</a>
11	Cloud MES Service	<a href="#">Genix MES Integration Service</a>
12	Production Lines – Time-Series Database	<a href="#">ABB Ability History</a> . Also, pre integrated and supporting <a href="#">Azure Data Explorer</a> , <a href="#">Timescale</a> and <a href="#">CrateDB</a> out of the box
13	Information Model Library	Genix Information Model Repository is a component of <a href="#">Genix Industrial DataOps Express</a>
14	Product Database	<a href="#">Genix Industry Cognitive Model</a> on any RDBMS
15	Dashboards	Genix Dashboard Manager is a component of <a href="#">Genix Analytics App Studio</a>
16	AI-Assisted Analytics	<a href="#">Genix AI Express</a> for Analytical <a href="#">Genix CoPilot</a> for Generative AI
17	Asset Admin Shell Library	<a href="#">Genix Digital Twin Hub</a> provides asset templates and digital twin modeler and runtime. DTC AAS Repository used for asset information registry
18	Dataspace Connector Provider	<a href="#">Genix Knowledge Services Hub</a>
19	Connected Product Time-Series Database	<a href="#">ABB Ability History</a> . Also, pre integrated and supporting <a href="#">Azure Data Explorer</a> , <a href="#">Timescale</a> and <a href="#">CrateDB</a> out of the box
20	Cloud to Edge Messaging App	Genix Industrial DataOps Message Sync is a component of <a href="#">Ge-nix Industrial DataOps Express</a>

UA Cloud Initiative Reference Architecture – Commercial offerings BECKHOFF

Nummer	Generic name	
1	Machines	<a href="#">TF6100 TwinCAT 3 OPC UA</a> offers Client/Server and OPC UA PubSub
6	PubSub Data Publisher & PubSub Action Processor	<a href="#">TF6720 TwinCAT 3 IoT Data Agent offer</a> OPC UA Client to OPC UA over MQTT

UA Cloud Initiative Reference Architecture – Commercial offerings Mitsubishi-Electric

Nummer	Generic name	
1	Machines (building product)	<a href="#">GENESIS64</a>  <a href="#">RD81OPC96</a> <a href="#">MELSEC iQ-R Series OPC UA server module</a>  <a href="#">FX5-OPC</a> <a href="#">MELSEC iQ-F Series OPC UA server module</a>

UA Cloud Initiative Reference Architecture – Commercial offerings Honeywell

Nummer	Generic name	
1	Machines (building product)	<a href="#">ControlEdge PLC</a>  <a href="#">ControlEdge UOC</a>
6	PubSub Data Publisher & PubSub Action Processor	<a href="#">Honeywell Enabled Services</a>  <a href="#">Matrikon Data Broker (MQTT Publisher)</a>

UA Cloud Initiative Reference Architecture – Commercial offerings Rockwell Automation

Nummer	Generic name	
1	Machines (building product)	<a href="#">PLC Programmable Controllers   Allen-Bradley   US</a>
4	Industrial Connectivity Software	<a href="#">FactoryTalk Linx Gateway Software   FactoryTalk   US</a>
5	On-premises MES	<a href="#">MES Automation and Orchestration   Plex</a>  <a href="#">FactoryTalk ProductionCentre   FactoryTalk   US</a>
6	Gateway	<a href="#">FactoryTalk Optix   FactoryTalk   US</a>
9	Edge Management	<a href="#">Margo - Edge interoperability for industrial automation ecosystems</a>
11	Cloud MES Service	<a href="#">MES Systems: Manufacturing Execution System Software   Plex</a>
12	Production Lines Time-Series Database	<a href="#">FactoryTalk DataMosaix: Industrial DataOps Solution   FactoryTalk   US</a>
15	Dashboards	<a href="#">FactoryTalk DataMosaix: Industrial DataOps Solution   FactoryTalk   US</a>

UA Cloud Initiative Reference Architecture – Commercial offerings Schneider Electric

Nummer	Generic name	
1	Machines (building product)	Modicon series controllers and OPC UA compatible modules : 1. <a href="#">Modicon M580 dPAC with BMENUA0100 OPC UA Embedded Module</a> .  2. <a href="#">Modicon M262 Logic/Motion controller</a>  3. <a href="#">PacDrive LMC.Pro motion controllers</a>  4. <a href="#">Modicon M241 &amp; M251 Micro Controller</a>  5. <a href="#">ATV dPAC</a>  6. <a href="#">Modicon Edge IO NTS</a>  7. BMEECN0100H (Edge Compute Node module for M580 PLCs) with embedded uDC Server (OPC UA Server by Prosyst by Schneider)
2	Information Model Viewer	Prosyst by Schneider OPC UA Modeler (based on UML modelers) to create and export information models
4	Industrial Connectivity Software	1. uDC Server (Unified Data Collector) by Prosyst by Schneider: <a href="#">OPC UA server exposing OT Data regardless of the OT Controller protocol in OPC UA</a>  2. uDC aggregation server used to collect OT Data from several OPC UA servers.  3. <a href="#">Ecostruxure OPC UA server expert - for connection throuhg Modican controllers</a>
5	On-premises MES	<a href="#">AVEVA MES system</a>
6	PubSub Data Publisher & PubSub Action Processor	uDC Data Provider supporting OPC UA PubSub over MQTT and MQTTS communication - Prosyst by Schneider
9	Edge Management	1. uDC Plant Manager and Enterprise Monitor for remote monitoring, diagnosis and management of uDC servers deployed on premise - Prosyst by Schneider.  2. Margo - Edge interoperability for industrial automation ecosystems.

UA Cloud Initiative Reference Architecture – Commercial offerings Siemens

Nummer	Generic name	
1	Machines (building product)	<a href="#">SIMATIC S7-1500 and ET 200SP CPU</a> with integrated OPC UA Client/Server and <a href="#">OPC UA PubSub via library</a> . <a href="#">SINUMERIK OPC UA Server</a> for tool machine controllers
2	Information Model Viewer	<a href="#">Siemens OPC UA Modeling Editor (SiOME)</a> – free of charge
3	Edge Broker	Siemens Industrial Edge
4	Industrial Connectivity Software	Connectivity Software for brown-/greenfield data integration – integrated into multiple products for different industries & applications – <a href="#">SIMATIC WinCC SCADA Systems</a> – <a href="#">Industrial Information Hub</a> : Edge-based Shopfloor integration platform – <a href="#">MindConnect</a> : Insights Hub Gateway – <a href="#">Opcenter Connect</a> : MES/ERP Gateway – <a href="#">CMS1200</a>
5	On-premises MES	<a href="#">Opcenter</a>
6	Gateway	Hardware and Software Gateways tailored to different industries and application scenarios: <a href="#">SIMATIC WinCC SCADA Systems</a> , <a href="#">Industrial Information Hub</a> , <a href="#">Opcenter Connect</a> , <a href="#">IoT Gateways</a> , <a href="#">SIMATIC CloudConnect Z</a> , <a href="#">SIMATIC CN 4100</a>
7	Dataspace Connector Consumer	Insights Hubs' Cross-Tenancy, Policy Based Access Control
8	Cloud Broker	<a href="#">Insights Hub</a> with <a href="#">MindConnect MQTT</a> and full PubSub support, Opcenter X NATS Broker with Pub/Sub and Request/Response support
9	Edge Management	<a href="#">Siemens Industrial Edge Management System</a>
11	Cloud MES Service	<a href="#">Opcenter X</a>
12	Production Lines – Time-Series Database	<a href="#">SIMATIC WinCC SCADA Systems</a> , <a href="#">Insights Hub Timeseries Services</a> , <a href="#">SIMATIC Process Historian</a>
13	Information Model Library	Asset Library in Asset Manager in sync with on-prem located Industrial Information Hub and compliant to the OPC UA PubSub model
14	Product Database	<a href="#">Teamcenter X</a>
15	Dashboards	<a href="#">Dashboard Designer</a> , Business Intelligence. Turn key apps for Energy-, Performance- and DriveTrain Analytics available.
16	AI-Assisted Analytics	Range from <a href="#">Production Copilot</a> , custom Agents and their Skills to out of the box AI industry solutions like Quality Prediction, Senseye for maintenance, Energy Optimizer to custom AI model development and management in Predictive Learning (via Python), <a href="#">SiePA</a> , <a href="#">gPROMS</a> , <a href="#">SIMATIC easSie</a> , <a href="#">Drivetrain Analyzer (DTA) X-Tools</a>
17	Asset Admin Shell Library	Translation Service from Asset Management to AAS
18	Dataspace Connector Provider	Policy Based Access Control and cross-tenancy sharing via contracts allows to share data
19	Connected Product – Time-Series Database	<a href="#">Insights Hub – Timeseries Services</a> (raw & aggregated) and Event Services based on machine data model. Including Remote Service option to securely connect to the machine for updates
20	Cloud to Edge Messaging App	<a href="#">MindConnect MQTT and OPC UA</a> for messaging from the cloud to the edge via MQTT or RestAPI Opcenter Connect supports bi-direction cloud to edge communication
22	Dataspace Connector Consumer	via provided RestAPI Services <a href="#">Opcenter Connect</a> , <a href="#">Active integration Gateway</a>
