About us

Aruba S.p.A. is an Italian company that has been providing web services and IT solutions since 1994.

Today, Aruba is **Italian leading provider of Hosting, Cloud, and Trust Services**, serving 5 millions SMBs, large enterprises, and public administrations.

In Italy, Aruba has built and **operates three data center campuses** that exceed global security standards, along with its own **ACN*-qualified cloud platform** offering IaaS and PaaS services and solutions.

The Aruba Group is a fully owned Italian family business.

* Italian National Cybersecurity Agency.

Aruba Data Centers

Data Centers

In over 30 years, Aruba has gained significant experience in designing and managing high-tech Data Centers, owned and located within the national territory. These Data Centers come equipped with infrastructures and facilities that comply with the highest industry security standards (Rating 4 ANSI/TIA-942), certified ISO 22237, and are designed to be green-by-design.

The infrastructure network of the group also extends to Europe with a proprietary Data Center in the Czech Republic and partner facilities located in France, Germany, Poland, and the UK.
